PROFESSIONAL SCHOOL
SAFETY AND SECURITY

SHIELD

Presidential Protection for Students

SHIELD, from Secure Environment Consultants, places our highly trained and experienced SHIELD Safety Managers and Directors of Safety and Security directly in your halls.

For more than 10 years, SEC has worked with thousands of schools across the country to create safe learning environments.

SHIELD brings the power of unparalleled safety expertise so you can focus on what's important: Providing your students with the best education experience possible.

It begins with training

Our safety and security professionals go through our SEC Certified program to ensure they are vetted and trained to apply their skills and experience in school environments. The extensive program utilizes a holistic approach to cover:

- Non-violent crisis intervention with advanced physical skills through Crisis Prevention Institute
- Blue-Card Certification by the Crisis Prevention Institute
- Critical incident management
- Behavioral threat assessment
- Tactical and physical awareness
- Mental health awareness
- Relationship building
- CPR, AED, First Aid + Stop the Bleed training
- Site assessments
- Rules, regulations and federal laws such as Title IX
- District emergency plans
- Running and monitoring of emergency drills
- Providing after-action reviews of incidents
- Staff training

We believe building strong **relationships with students** and staff is integral to our success. We don't just monitor the halls – we engage to build meaningful connections. We strive to feel the pulse of the school to head off any potential issues. We know a focus on humans is the first line of defense.

Whatever your needs are, we have professional solutions for you.

SAFETY MANAGERS

Our unique SHIELD model embeds a professional safety manager on your team. They get to know your students, teachers and staff in a real and meaningful way. They are focused solely on your school, working to improve safety and security day in and day out through active monitoring, incident management, training and more.

DIRECTORS OF SAFETY AND SECURITY

Our Directors of Safety and Security work in collaboration with your district leadership and school administration to establish appropriate regulations, procedures and plans to ensure safe and secure schools, including overseeing any district security staff.

POWERED BY SEC

With SHIELD, you'll also have the full backing of Secure Environment Consultants, should you ever need it. Our team of former Secret Service agents, Navy SEALs, Green Berets, FBI agents and other high-level law enforcement professionals are the leading experts in school safety and security.

Our proprietary **SEC CERTIFIED** training program was developed using the highest-level safety and security experience coupled with student-centered best practices.
